Complete supply chain transparency is what sets Natural Plant Products apart. Our oilseed crops are grown on our farms, extracted and refined with trusted manufacturing partners, shipped globally to our exclusive distributors and delivered directly to their customers.

1. **GROW MEADOWFOAM**
   NPP's grower members have been growing meadowfoam in their crop rotations for over thirty years.

2. **EXTRACT & REFINE**
   NPP contracts the extraction and refining of meadowfoam through long-standing relationships with our manufacturing partners.

3. **SHIP TO DISTRIBUTORS**
   Once the meadowfoam seed oil is packaged, it is shipped around the world to our exclusive distribution partners.

4. **SHIP TO MANUFACTURERS**
   When manufacturers place an order, our distributors ship the oil in NPP factory-sealed and labeled packaging.

**Growing Meadowfoam in the Willamette Valley of Oregon, USA**

- **FALL**
  - Meadowfoam is planted in Oregon, USA in October each year.

- **WINTER**
  - In October and November meadowfoam grows to about 2-3' tall.
  - Meadowfoam plants lay dormant through the cold, wet winter months.

- **SPRING**
  - In May, the meadowfoam fields are in full bloom for pollination.
  - After pollination, the warm Oregon sun dries the meadowfoam plants.

- **SUMMER**
  - In the beginning of July, the growers mow the fields using a swather.
  - Two weeks later, growers harvest the seed using specially designed combines.
